

Junction City ITS Corridors

Upgrading and synchronizing the existing traffic signal corridors along 6th St (Eisenhower to Washington St) and Washington St (6th St to 9th St). Upgrades include software, electronic equipment, wiring and cabinetry. These upgrades will result in the reduction in traffic congestion as signals will communicate with each other, resulting in synchronized signals allowing better traffic flow.

Total Project Cost:	\$380,000
----------------------------	------------------

TERS Funds:	\$304,000
